

Setting Up Selenium WebDriver

Install the Selenium Installer from downloaded folder OR <https://florentbr.github.io/SeleniumBasic/> and click on Release page.

==> <https://sites.google.com/a/chromium.org/chromedriver/downloads>

Then go to your selenium path – C:\Users\%username%\AppData\Local\SeleniumBasic and replace the chrome driver with the latest one and it should work fine.

Make sure in VBA, the references has Selenium Type Library checked.
